

OPERATIONS RESEARCH AND ENGINEERING (BS)

College of Engineering

Program Website (<https://www.engineering.cornell.edu/orie/>)

CIP: 14.3701 | HEGIS: 0913.00 | NYSED: 05601

Program Description

This major provides a broad education in the techniques and modeling concepts needed to design, analyze, and operate complex systems. The major prepares students for a wide range of careers including operations research, information technology, entrepreneurship, operations management, consulting, financial engineering, financial services, and engineering management.

The foundation of the major is the development of basic skills in statistics, probability, mathematical optimization, and computer science. Required courses in industrial systems, cost accounting, and simulation build on these skills and provide engineering analysis experiences. In the senior year the curriculum is quite flexible. Students take ORIE electives to broaden and deepen their expertise in applied probability and statistics, industrial systems, optimization, information technology, financial engineering, and their applications.

Because of the wide range of career goals among ORE students, and the large number of electives, students should consult with their major advisors to select electives that best meet their future goals.

Exceptional students interested in pursuing graduate studies are encouraged to speak with their faculty advisors concerning an accelerated program of study.

Academic Standing

Each student in the ORE major should obtain a passing grade in every course; at least C in ENGRD 2700 Eng Probability and Statistics: Modeling and Data Science and MATH 2940 Linear Algebra for Engineers, at least a C- in all ORIE major-required courses; a cumulative GPA of 2.0; a cumulative GPA of 2.0 for ORE major courses¹; a grade of C- or better in ENGRD 2110 Object-Oriented Programming and Data Structures by the end of the sixth semester; and satisfactory progress toward completion of the degree requirements. Each student's performance is reviewed at the conclusion of each semester.

If at least C- is not earned in a required ORIE course, the course must be repeated within one year. The next course in a sequence (ORIE 3310 Optimization II and ORIE 3510 Stochastic Processes for Decision-Making, in particular) may not be taken until at least a C- is achieved in the prerequisite course. Failure to achieve at least C- in the second attempt will generally result in withdrawal from the major.

¹ ORIE major courses used to calculate GPA include engineering core courses, engineering distribution courses (ENGRI XXXX, ENGRD 2700 Eng Probability and Statistics: Modeling and Data Science and ENGRD 2110 Object-Oriented Programming and Data Structures), major required courses, ORIE electives, and major approved electives. It does not include liberal studies courses or courses taken to fulfill the

requirements for another major/minor. With courses that are repeated, only the highest grade is used in the calculation.

Honors Program

The B.S. degree with honors is granted to engineering students who satisfy the requirements given on the "Undergraduate Study and Graduation Requirements" page as well as the following requirements.

The 9 additional credits of course work shall be from one or more of the following, with at least 4 credits in the first category:

- Select ORIE courses at the 5000-level, and all ORIE courses at the 6000-level and above with the exception of seminars and colloquia.
- A significant research experience or honors project under the direct supervision of an ORIE faculty member using ORIE 4999 ORIE Project or ORIE 4900 Undergraduate Research in ORIE. A significant written report must be submitted as part of this component.
- A significant teaching experience under the direct supervision of a faculty member in ORIE using ORIE 4990 Teaching in ORIE.

Procedures

Each program must be approved by the Associate Director of Undergraduate Studies, and any changes to a program must be approved by the Associate Director.

Program Information

- Instruction Mode: In Person
- Location: Ithaca, NY
- Minimum Credits for Degree: 125

Common Curriculum

A student who intends to affiliate with the major in operations research and engineering should take ENGRD 2700 Eng Probability and Statistics: Modeling and Data Science after completing MATH 1920 Multivariable Calculus for Engineers. ORE affiliates are required to complete MATH 1910 Calculus for Engineers, MATH 1920 Multivariable Calculus for Engineers, and MATH 2940 Linear Algebra for Engineers (or their subject matter equivalents). Either MATH 2930 Differential Equations for Engineers, CS 2800 Mathematical Foundations of Computing, or MATH 3040 Prove It! may be used to satisfy the fourth semester mathematics requirement. Students should discuss with their advisors which of these three courses is most appropriate to their future program of study in ORE. The following should be considered:

- MATH 2930 Differential Equations for Engineers is essential for advanced study in financial engineering. Also, MATH 2930 Differential Equations for Engineers is a prerequisite for PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics, thus students who do not take MATH 2930 Differential Equations for Engineers must plan to take an alternative to PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics.
- CS 2800 Mathematical Foundations of Computing provides an introduction to discrete structures and algorithms of broad applicability in the field of operations research, particularly for fundamental models in the areas of optimization, production scheduling, inventory management, and information technology; it is also a prerequisite for certain upper-class Computer Science courses in the areas of information technology and algorithmic analysis.

- MATH 3040 Prove It! covers fundamentals of formal proof techniques.

The following courses may be used to satisfy the PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics requirement: PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics or PHYS 2218 Physics III: Waves and Thermal Physics, CHEM 2080 General Chemistry II, CHEM 2150 Honors General and Inorganic Chemistry, MATH 2930 Differential Equations for Engineers (if not used to meet the mathematics requirement), CS 2800 Mathematical Foundations of Computing (if not used to meet the mathematics requirement), MATH 3040 Prove It! (if not used to meet the mathematics requirement), MATH 3110 Introduction to Analysis or MATH 3360 Applicable Algebra may be taken in place of PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics. Students who do not take MATH 2930 Differential Equations for Engineers may not enroll in PHYS 2214 Physics III: Oscillations, Waves, and Quantum Physics (MATH 2930 Differential Equations for Engineers is a pre-requisite for Physics 2214) and should plan to enroll in one of the alternative courses.

Early consultation with a faculty member or the Associate Director for Undergraduate Studies may be helpful in making appropriate choices. Students considering Ph.D.-level study in operations research are encouraged to see the Associate Director for advice regarding the fourth Math course.

Program Requirements

The required courses for the ORE major and the typical terms in which they are taken are as follows:

Code	Title	Hours
Semester 1		
CHEM 2090	Engineering General Chemistry	3
MATH 1910	Calculus for Engineers	4
ENGRI 1XXX		
	First-Year Writing Seminar	3
	Physical Education Course	1
Semester 2		
PHYS 1112	Physics I: Mechanics and Heat	3
PHYS 1110	Introduction to Experimental Physics	1
MATH 1920	Multivariable Calculus for Engineers	4
CS 111X		
	First-Year Writing Seminar	3
	Physical Education Course	1
Semester 3		
ENGRD 2110	Object-Oriented Programming and Data Structures ²	4
ENGRD 2700	Eng Probability and Statistics: Modeling and Data Science ²	4
MATH 2940	Linear Algebra for Engineers ²	4
PHYS 2213	Physics II: Electromagnetism	4
Liberal Studies		
Semester 4		
ORIE 3120	Practical Tools for Operations Research, Machine Learning and Data Science ³	4
PHYS 2214	Physics III: Oscillations, Waves, and Quantum Physics	4

Select one of the following:

MATH 2930	Differential Equations for Engineers	
MATH 3040	Prove It!	
CS 2800	Mathematical Foundations of Computing	
Liberal Studies		
Semester 5		
ORIE 3150	Financial and Managerial Accounting (or)	4
Select one of the following:		4
MATH 3110	Introduction to Analysis	
MATH 4130	Honors Introduction to Analysis I	
MATH 4310	Linear Algebra	
MATH 4330	Honors Linear Algebra	
Any 6000 level or higher ORIE course		
ORIE 3300	Optimization I	4
ORIE 3500	Eng Probability and Statistics: Modeling and Data Science II	4
Liberal elective		
Advisor-approved elective		3
Semester 6		
ORIE 3310	Optimization II	4
ORIE 3510	Stochastic Processes for Decision-Making	4
Major-approved electives		3-4
Liberal elective		3
Semester 7 and 8		
ORIE 4580	Simulation Modeling and Analysis	4
Upper-level ORIE electives ⁴		9
Major-approved electives (at least 6 credits must be outside ORIE)		6-9
Liberal Electives		6
Advisor-approved Elective		3

² May be taken in the second or third semester.

³ It is highly recommended that ORIE 3120 Practical Tools for Operations Research, Machine Learning and Data Science be taken in semester 4. If the student's schedule does not permit this, the course may be taken in semester 6 or 8.

⁴ Available ORIE electives are as follows:

- all ORIE courses at the 4000 level or higher which are not listed as a Major Required Course, and which are not one of the following: ORIE 4152 Entrepreneurship for Engineers, ORIE 5142 Systems Analysis Behavior and Optimization, ORIE 5920 Enterprise Engineering Colloquium, ORIE 9000 ORIE Graduate Colloquium, and ORIE 9101. Additionally, ORIE 3741 Learning with Big Messy Data and ORIE 3800 may be used as ORIE Electives.
- ORIE 4990 Teaching in ORIE – at most 3 credits
- ORIE 4900 Undergraduate Research in ORIE, ORIE 4999 ORIE Project, CS 4999 Independent Reading and Research - at most 3 credits between the three courses.

University Graduation Requirements Requirements for All Students

In order to receive a Cornell degree, a student must satisfy academic and non-academic requirements.

Academic Requirements

A student's college determines degree requirements such as residency, number of credits, distribution of credits, and grade averages. It is the student's responsibility to be aware of the specific major, degree, distribution, college, and graduation requirements for completing their chosen program of study. See the individual requirements listed by each college or school or contact the college registrar's office (<https://registrar.cornell.edu/service-resources/college-registrar-directory/>) for more information.

Non-academic Requirements

Conduct Matters. Students must satisfy any outstanding sanctions, penalties or remedies imposed or agreed to under the Student Code of Conduct (Code) or Policy 6.4. Where a formal complaint under the Code or Policy 6.4 is pending, the University will withhold awarding a degree otherwise earned until the adjudication process set forth in those procedures is complete, including the satisfaction of any sanctions, penalties or remedies imposed.

Financial Obligations. Outstanding financial obligations will not impact the awarding of a degree otherwise earned or a student's ability to access their official transcript. However, the University may withhold issuing a diploma until any outstanding financial obligations owing to the University are satisfied.

Additional Requirements for Undergraduate Students

The University has two requirements for graduation that must be fulfilled by all undergraduate students: the swim requirement, and completion of two physical education courses. For additional information about fulfilling University Graduation Requirements, see the Physical Education website (<https://scl.cornell.edu/pe/>).

Physical Education

All incoming undergraduate students are required to take two credits (two courses) of Physical Education prior to graduation. It is recommended they complete the two courses during their first year at Cornell. Credit in Physical Education may be earned by participating in courses offered by the Department of Athletics and Physical Education (<https://catalog.cornell.edu/courses/pe/>) and Cornell Outdoor Education, by being a registered participant on a varsity athletic team, or performing in the marching band.

Students with medical concerns should contact the Office of Student Disability Services (<http://sds.cornell.edu/>).

Swim Requirement

The Faculty Advisory Committee on Athletics and Physical Education has established a basic swimming and water safety competency requirement for all undergraduate students. Normally, the requirement is taken during the Fall Orientation process at Helen Newman Hall or Teagle Hall pools. The requirement consists of the following: jump or step feet-first into the deep end of the pool, float or tread for one minute, turn around in a full circle, swim 25 yards using any stroke(s) of choice without touching the bottom or holding on to the sides (there is no time limit) and exit from the water. Students who do not complete the swim requirement during their first year, during a PE swim class or during orientation subsequent years, will have to pay a \$100 fee. Any student who cannot meet this requirement must register for PE 1100 Beginning Swimming as their physical education course before electives can be chosen.

If a student does not pass the swim requirement in their first Beginning Swimming PE class, then the student must take a second Beginning Swimming PE class (PE 1100 or PE 1101). Successful completion of two Beginning Swimming classes (based on attendance requirements) with the instructor's recommendation will fulfill the University's swim requirement.

Students unable to meet the swim requirement because of medical reasons should contact the Office of Student Disability Services (<http://sds.cornell.edu/>). When a waiver is granted by the Faculty Committee on Physical Education, an alternate requirement is imposed. The alternate requirement substitute is set by the Director of Physical Education.

College of Engineering Graduation Requirements

Undergraduate Study

Students in the College of Engineering spend most of their first two years of undergraduate studies in the Common Curriculum, which is administered by the College Curriculum Governing Board (CCGB) through the associate dean for undergraduate programs and Engineering Advising. By the end of their third semester, they typically apply to affiliate with an Engineering major and must be affiliated by the start of their fifth semester.

Criteria for affiliation with the majors are described in this section under "Affiliation with a Major". The Undergraduate Engineering Majors are listed on the College of Engineering Programs page (<https://catalog.cornell.edu/engineering/#programstext>).

Many of the majors have a corresponding minor, in which the student can pursue a secondary interest if eligible. In addition, there are minors that cut across majors including applied mathematics, engineering management, engineering statistics, game design, artificial intelligence, information science, and business. See Engineering Minors section of the College of Engineering Programs page (<https://catalog.cornell.edu/engineering/#programstext>) for a listing of Undergraduate Minors.

Engineering Core Requirements - Engineering Major Engineering Majors

To receive the bachelor of science degree, students must meet the requirements of the Common Curriculum (outlined below) as set forth by the College of Engineering, including the requirements of their chosen major, as established by the school or department that administers the major. (Further explanation of the revised Common Curriculum and major flow charts are provided in the *Engineering Undergraduate Handbook*.)

Course Category	Credits
Mathematics (major-specific)	14-16
Physics (major-specific)	8-13
Chemistry (major-specific)	4-8
First-year writing seminars	≥6
Engineering Communication ¹	1-3
Computing	4
Engineering Distribution	
a. One introduction to engineering (ENGR1)	3-4
b. Two engineering distributions (ENGRD)	6-8
Liberal studies distribution (6 courses min.)	≥18
Advisor Approved electives	≥6
Major program	

a. Major-required courses	≥30
b. Major-approved electives	≥9
c. Courses outside the major	≥9

Two semesters of physical education and demonstration of proficiency in swimming (university requirement)

¹ Engineering-communication courses may simultaneously fulfill another requirement.

Total credits required for graduation vary by major (see Engineering Majors).

Mathematics

The normal program in mathematics includes MATH 1910, MATH 1920, MATH 2930 or MATH 2940 depending on the major), and a major-specific math course for some majors. At least C– must be attained in these courses; if not, the course must be repeated immediately before the next course in the sequence is taken. Failure to achieve at least C– the second time will result in, at minimum, an automatic required leave of absence for one semester from the College of Engineering. Courses that are taken a second time do not yield additional credit toward a degree.

Physics

The normal program in physics includes PHYS 1112, PHYS 1110, PHYS 2213, and PHYS 2214 or the corresponding honors courses (PHYS 1116, PHYS 1110, PHYS 2210, PHYS 2217, and PHYS 2218). Engineering students should attain at least C– in each math prerequisite of a physics course before taking the physics course (e.g., C– in MATH 1910 before taking PHYS 1112 and C– in MATH 1920 before taking PHYS 2213). Substitutions for PHYS 2214 are possible in certain majors. Please consult the Engineering Undergraduate Handbook (<https://cornellengineeringhandbook.freeflowdp.com/cornellengineeringhandbook/library/>) for details.

Chemistry

CHEM 2090 and CHEM 2091 is required. While the content of CHEM 2090 and CHEM 2091 is the same as that of CHEM 2070 and span class="structuredcontent" college="all" contenteditable="false" department="CHEM" id="courseinline24" title="Inline Course - Double Click to Edit">CHEM 2071, Engineering students are expected to take CHEM 2090 and CHEM 2091.

Typically, CHEM 2090 and CHEM 2091 is taken during the first year, but students who wish to first complete the physics sequence (PHYS 1112, PHYS 1110, PHYS 2213, and PHYS 2214, depending on the major) may postpone CHEM 2090 and CHEM 2091 until the sophomore year.

Students considering chemical engineering or a health-related career such as medicine must take CHEM 2090 and CHEM 2091 in the fall of their first year and CHEM 2080 and CHEM 2081 in the spring semester.

Computing

Students must complete one Introduction to Computing course during either semester of the first year. Students can take either CS 1110 or CS 1112. Some majors may have a preference of either CS 1110 or CS 1112, however, either one will count toward the degree requirement.

First-Year Writing Seminars

Each semester of their first year, students choose a first-year writing seminar from courses offered by over 30 different departments across

the university. These courses offer the student practice in writing English prose and college level discourse within a small class (<20) setting.

Engineering Communications

Students can fulfill the Engineering Communications Requirement using one of the options below. See the Engineering Communications Program website (<https://www.engineering.cornell.edu/courses-requirements/bachelor-science-requirements/engineering-communications-requirement/>) for more information.

Category A: Via the Engineering Communications Program Courses and Opportunities

1. Engineering Communication Program Courses

Courses in this category, offered by the Engineering Communications Program (ECP), develop communication skills in a variety of genres, including writing, presenting, multimodal forms, graphics, charts, posters, and other. These courses fulfill the Engineering Communication Requirement for Cornell's College of Engineering.

Code	Title	Hours
ENGR 3025	Creating and Communicating Your Digital Professionalism	1
ENGR 3026	Engineering Presentations and Expert Presence	1
ENGR 3027	Cross-cultural Communications and Ethics in the Workplace	1
ENGR 3340	Independent Study in Engineering Communications	1-3
ENGR 3350	Organizational Communications for Engineers	3
ENGR 3500	Engineering Communications	3
ENGR 3700	Communications Consulting for Engineers	3

2. Complete a Communication-Intensive Co-op, listed as ENGR 3024

This is an opportunity to combine work and academics. Some co-op students do a significant amount of writing and other communicative work on the job; under certain circumstances, a set of authentic work artifacts combined with on-site manager reviews and guide, reflective summary assignments with an ECP instructor will satisfy the Engineering Communications Requirement. This option does not count toward the Liberal Studies requirements for engineers. Students should begin organizing this request the semester prior to being on-site for the co-op or internship. Not offered AY 2025-2026.

3. Enroll in and pass ENGR 3023

A one credit attachment to an engineering course that is not one of the officially designated W-I or C-I courses. CE instructors may occasionally wish to extend communication competencies with added work inside their course for a given semester so that it will fulfill the Engineering Communications Requirement. With approval from the College Curriculum Governing Board (CCGB) Subcommittee on Engineering Communications, instructors may have students co-register in ENGR 3023, which may be taken more than once with different courses by permission of the engineering instructors. This option does not count toward the Liberal Studies requirement for engineers, even via petition. More information can be found at the Cornell Engineering website (<https://www.engineering.cornell.edu/courses-requirements/bachelor-science-requirements/engineering-communications-requirement/engrc-3023/>).

To begin, send an email to engrcomm_info@cornell.edu, requesting the full ENGR 3023 information packet. Please insert "3023 request" in the subject line.

Paperwork is due by the last Wednesday in January for the Spring semester.

4. Complete and Pass a One Credit Partner Course

The current options are below, and they require enrollment in the departmental course (usually three credits) and its corresponding ENRGR course (one credit). The below courses do not count toward the Liberal Studies requirement for engineers, even via petition:

Code	Title	Hours
ENGR 3120	Communications for Practical Tools for Operations Research, Machine Learning and Data Science ¹	1
ENGR 3152	Communication for Game Development ²	1
ENGR 3610	Communication for Transportation Engineering ³	1
ENGR 4152	Communication for Advanced Game Development ⁴	1
ENGR 4590	Physical Design Communication in Biological Engineering ⁵	1

¹ 1 cr partnered with ORIE 3120 Practical Tools for Operations Research, Machine Learning and Data Science

² 1 cr partnered with CS 3152 Introduction to Computer Game Architecture/INFO 3152 Introduction to Computer Game Design

³ 1 cr partnered with CEE 3610 Introduction to Transportation Engineering

⁴ 1 cr partnered with CS 4152 Advanced Topics in Computer Game Architecture/INFO 4152 Advanced Topics in Computer Game Design

⁵ 1 cr partnered with BEE 4590 Physical Design in Biological Engineering

5. **Apply for ENGR 3341 Guided Fieldwork for Engineering Communications**

Occasionally, a student will be doing a significant amount and variety of engineering or technical communication elsewhere in the College of Engineering, usually as part of a research team, as part of leadership in a project team, and the like. It may be appropriate to petition the CCGB's Subcommittee on Engineering Communications for permission to use as ENGR 3341 as an option for upcoming projects (not past ones) to meet the Engineering Communications Requirement. This option does not count toward the Liberal Studies requirement for engineers, even via petition. It is essential for students and their mentoring Engineering faculty to prepare well in advance for this option. Request the information packet and form by emailing engrcomm_info@cornell.edu with "3341 request" in the subject line. This option is not to be used for work done by teaching assistants, nor is it to be used to finish up work from prior semesters in another course. More information can be found at the Cornell Engineering website (<https://www.engineering.cornell.edu/courses-requirements/bachelor-science-requirements/engineering-communications-requirement/engrc-3341/>).

Paperwork is due by the last Wednesday in August for the Fall semester and the last Wednesday in January for the Spring semester.

Category B: Via Other Paths

1. **Take an officially designated Writing-Intensive (W-I) or Communication-Intensive (C-I) engineering course.**

- Note: The following course list is not comprehensive, as different engineering departments may offer W-I or C-I courses on an ad-hoc basis. Indeed, these offerings can change each semester. Students need to check with their major advisors each semester to confirm if a course will fulfill the Engineering Communications Requirement; curriculum approvals are made by each major via CCGB approval. W-

I or C-I courses are based in a major, as part of that major's regular core offerings to its declared/affiliated undergraduate majors. This option does not count toward the Liberal Studies requirement for engineers, even via petition. See also the CE Undergraduate Handbook (<https://www.engineering.cornell.edu/engineering-undergraduate-handbook/>).

- It's important to note that these options usually only fulfill the Engineering Communications Requirement for their own majors. Students, advisors, and departments need to cross check against each student's major requirements for graduation. The Engineering Communications Program does not control, monitor, or assess for these courses. This option does not count toward the Liberal Studies requirement for engineers, even via petition.

Code	Title	Hours
BEE 4530	Computer-Aided Engineering: Applications to Biological Processes (crosslisted)	3
BEE 4730	Watershed Engineering	4
BEE 4590	Physical Design in Biological Engineering	3
BME 4190	Laboratory Techniques for Molecular, Cellular, and Systems Engineering	3
BME 4390	Circuits, Signals and Sensors: Instrumentation Laboratory	3
BME 4490	Biomechanics Laboratory (crosslisted)	3
CHEM 4320	Chemical Engineering Laboratory	4
ECE 4920	ECE Technical Writing	1
MAE 4272	Fluids and Heat Transfer Laboratory	3
MSE 4030	Senior Materials Laboratory I	4
ORIE 4100	Manufacturing Systems Design: A Consulting Boot Camp	4

2. **Enroll in and Pass COMM 3020 or COMM 3030**

- Enroll in and pass COMM 3020 or COMM 3030 taught by the Department of Communication (in the College of Agriculture and Life Sciences). The Engineering Communications Program does not control, monitor, or assess for these courses. This option does not count toward the Liberal Studies requirement for engineers, even via petition. See also the CE Undergraduate Handbook (<https://www.engineering.cornell.edu/students/undergraduate-students/curriculum/engineering-undergraduate-handbook/>).

Introduction-to-Engineering Course:

An introduction-to-engineering course (designated ENGR1) is expected to be completed by the end of a student's first year. This course introduces students to the engineering process and provides a substantive experience in an open-ended problem-solving context. See the Introduction-to-Engineering course listing for current course offerings.

3. **Enroll in and pass HADM 3670, taught through the Nolan School**

- The Engineering Communications Program does not control, monitor, or assess for these courses. This option does not also fulfill the Liberal Studies requirement, even via petition. See also the Engineering Undergraduate Handbook (<https://www.engineering.cornell.edu/engineering-undergraduate-handbook/>).

Engineering Distribution

Two engineering distribution (ENGRD) courses (6–8 credits) must be selected from two different categories listed below. A student may use any one of the possible substitutions described.

1. Scientific computing:

Code	Title	Hours
ENGRD 2110	Object-Oriented Programming and Data Structures (crosslisted)	4
ENGRD 2112	Object-Oriented Design and Data Structures - Honors (crosslisted)	4
ENGRD 2140	Computer Systems Programming (crosslisted)	4
ENGRD 3200	Engineering Computation (crosslisted)	4

2. Materials Science:

ENGRD 2610 Mechanical Properties of Materials: From Nanodevices to Superstructures
ENGRD 2620 Electronic Materials for the Information Age

3. Mechanics:

ENGRD 2020 Statics and Mechanics of Solids

Note: Majors in Engineering Physics may use AEP 3330 as an ENGRD in this category.

4. Probability and statistics:

ENGRD 2700 Eng Probability and Statistics: Modeling and Data Science

Note: Majors in Engineering Physics may substitute MATH 4710 for ENGRD 2700. Majors in Civil Engineering, Biological Engineering, and Environmental Engineering may substitute CEE 3040 for ENGRD 2700.
ENGRD 2720

5. Electrical sciences:

Code	Title	Hours
ENGRD 2100	Introduction to Circuits for Electrical and Computer Engineers (crosslisted)	4
ENGRD 2300	Digital Logic and Computer Organization (crosslisted)	4
ENGRD 2550	Engineering Quantum Information Hardware (crosslisted)	3

6. Thermodynamics and energy balances:

ENGRD 2111 Biomolecular Thermodynamics
ENGRD 2190 Chemical Process Design and Analysis
ENGRD 2210 Thermodynamics

1. Earth and life sciences:

Code	Title	Hours
ENGRD 2250	The Earth System (crosslisted)	4
ENGRD 2510	Engineering Processes for Environmental Sustainability (crosslisted)	3
ENGRD 2600	Principles of Biological Engineering (crosslisted)	3

2. Biology and chemistry:

Code	Title	Hours
ENGRD 2202	Biomedical Transport Phenomena (crosslisted)	3
CHEM 3890	Honors Physical Chemistry I	4
ENGRD 2520	The Physics of Life (crosslisted)	3
BIOMG 3300	Principles of Biochemistry, Individualized Instruction	4

or BIOMG 331 (Principles of Biochemistry: Proteins and Metabolism

or BIOMG 335 (Principles of Biochemistry: Proteins, Metabolism, and Molecular Biology

Additional Information

Some majors may require completion of 9 specific engineering distribution courses for affiliation (acceptance into the major), or as a prerequisite for upper-class courses. For complete information, please see Affiliation with a Major and the flow charts for each major in the Engineering Undergraduate Handbook (<https://www.engineering.cornell.edu/engineering-undergraduate-handbook/>).

Note: Some majors require additional distribution courses after affiliation.

Liberal Studies Distribution

Global and diverse societies require that engineers have an awareness of historical patterns, an appreciation for different cultures, professional ethics, the ability to work in multifaceted groups, and superior communication skills. Cornell has a rich curriculum in the humanities, arts, and social sciences, enabling every engineering student to obtain a truly liberal education. The rationale for these distribution courses is discussed in the Requirements for Graduation section of the *Engineering Undergraduate Handbook* and these courses should be chosen with as much care and foresight as courses from technical areas.

Requirements:

- At least six courses (totaling at least 18 credits)
- The six courses must be chosen from the categories listed and come from at least three different groups outlined in the following section
- At least 3 or more credits must be chosen from Group 7
- No more than two courses may be chosen from Group 6 (CE)
- At least two courses must be at the 2000 level or higher

The categories outlined above have been organized into seven Groups based on common themes in content. Those Groups are as follows:

Group 1. Cultural Analysis, Literature and the Arts, Social Differences

- Cultural Analysis (CA)
- Literature and the Arts (LA)
- Literature, the Arts and Design (LAD)
- Arts, Literature, and Culture (ALC)
- Social Difference (SCD-HA only. SCD-AS not allowed in this group.)

Group 2. Historical Analysis

- Historical Analysis (HA/ HST)

Group 3. Ethics, Cognition, and Moral Reasoning

- Knowledge, Cognition, and Moral Reasoning (KCM)
- Ethics and the Mind (ETM)

Group 4. Social Science and Global Citizenship

- Social and Behavioral Analysis (SBA)
- Social Sciences (SSC)
- Global Citizenship (GLC)

Group 5. Foreign Languages (not literature courses) (FL)

- Courses teaching language skills, inclusive of reading, writing, listening, and spoken non-English languages, at beginning to advanced levels.

Group 6. Communications in Engineering (CE)

- Engineering specific courses exploring communication as a way of acting in the world
- Courses must be specifically designated by CCGB as satisfying the CE category (no petitions)
- No more than two courses from this category may be used to satisfy the liberal studies requirement

Group 7. Race and Equity

- Social Difference (SCD-AS only. SCD-HA not allowed in this group)
- Diversity (D-AG only. D-HE not allowed in this group)

Students should utilize the current Courses of Study as the master list of approved liberal studies courses. Refer to Cornell Engineering Advising's Liberal Studies Policies (<https://liberal-studies.engineering.cornell.edu/>) webpage for complete lists of additional approved courses and unacceptable courses. Please direct any questions to Engineering Advising, 180 Rhodes Hall.

Electives

- **Advisor-Approved electives:** 6 credits required (approved by the faculty advisor¹). Because these courses should help develop and broaden the skills of the engineer, faculty advisors generally accept the following as approved electives (as long as they are not being used elsewhere toward degree requirements):
 - One additional introduction-to-engineering course (ENGRI)
 - Engineering distribution courses
 - Courses stressing written or oral communication
 - Upper-level engineering courses
 - Advanced courses in mathematics
 - Rigorous courses in the biological and physical sciences
 - Courses in business, economics, or language (when they serve the student's educational and academic objectives)
 - Courses that expand the major or another part of the curriculum, including liberal studies electives not already being used toward the Liberal Studies Distribution requirement.
- Up to 6 credits of approved electives may come from ROTC courses at the 3000-level or higher.
- **Major-approved electives:** 9 credits (approved by the major and faculty advisors in the major). Refer to the major curricula for descriptions of courses in this category.
- **Outside-the-major electives:** 9 credits of courses outside the major to ensure breadth of engineering studies; these courses may be subject to major specific requirements for appropriateness.

¹ In the event a student and their faculty advisor disagree regarding the suitability of an approved elective, the student may appeal the decision to the Director of Undergraduate Studies (Associate Director) for their major department or to the Associate Dean for Undergraduate Programs.

First-Year Requirements

During the first year, engineering students are expected to complete (or receive credit for) the following core requirements:

Code	Title	Hours
MATH 1910 & MATH 1920	Calculus for Engineers and Multivariable Calculus for Engineers	4
Select two of the following:		4-8

CHEM 2080	General Chemistry II	
CHEM 2081	General Chemistry II Laboratory ¹	1
CHEM 2090	Engineering General Chemistry	
PHYS 1112	Physics I: Mechanics and Heat	
PHYS 1110	Introduction to Experimental Physics	
PHYS 2213	Physics II: Electromagnetism	
PHYS 2214	Physics III: Oscillations, Waves, and Quantum Physics (or the Honors equivalent) ²	
One of: CS 111X		
Two first-year writing seminars		
One introduction to engineering (ENGRI) course		
Two physical education courses and the university swim test		

¹ Depends on the major.

² Depending on the major, students interested in chemical engineering, pre-med, or other health-related careers should enroll in the CHEM 2090 and CHEM 2091 - CHEM 2080 and CHEM 2081 sequence during their first year.

Students interested in biomedical engineering should additionally complete BIOMG 1350 during the first year.

Affiliation with a Major

Students are encouraged to apply for affiliation with a major during the first semester of their sophomore year, although earlier affiliation may be granted at the discretion of the major. This is done by completing the Application for Major Affiliation via the Engineering Registrar's website. To affiliate, students must:

1. make good progress toward completing required courses in the common curriculum,
2. have a GPA ≥ 2.0 , and
3. have satisfied the major's course and grade requirements as specified below:

Students must be affiliated or conditionally affiliated with a major by the beginning of their fifth semester or they will be withdrawn from the College of Engineering, and therefore Cornell.

Biological Engineering¹

Minimum cumulative GPA of 2.5 and at most one grade below C- in any math, chemistry, physics, and engineering courses: [CS 1110](#), CS 1112, ENGRI, ENGRD, and any engineering course cross-listed with ENGRI or ENGRD. Completion of BEE 2600/[ENGRD 2600](#) or ENGRD 2510 with at least C-, and one year of Introductory Biology (two lectures and a lab) with grades of at least C-. Allowable courses include BIOMG 1350, BIOG 1440, BIOG 1445 BIOG 1500, and BIOEE 1610. No more than two credits of research/project team and two credits of arts performance courses will count toward the cumulative GPA required for affiliation.

Biomedical Engineering

Minimum GPA of 2.4 in designated math, science, and engineering courses completed with grades of C- or higher.

To apply for affiliation in the third semester, a student must be on track to complete the following requirements by the end of the third semester: BIOMG 1350 (or a score of 5 on the CEEB AP Exam (or equivalent)), MATH 1910, MATH 1920, MATH 2930, PHYS 1112, PHYS 1110, PHYS 2213, CHEM 2090 CHEM 2091, ENGRD 2111, CS 111X, and any ENGRI. BIOG 1440 cannot be used to satisfy this requirement for students entering Fall 2017 and after.

To apply for affiliation in the fourth semester, a student must be on track to complete the above courses plus the following additional courses by the end of the fourth semester: MATH 2940, ENGRD 2020, BME 2000, and BME 2010.

Chemical Engineering

At most one grade below C- in chemistry, math, physics, and chemical engineering courses, and a GPA ≥ 2.2 in math, science, and engineering courses (except independent study, seminar, research, or project teams).

To apply for affiliation in the third semester, a student must be on track to complete the following requirements by the end of the semester:

- Mathematics: MATH 1910, MATH 1920, and MATH 2930
- Chemistry: CHEM 2090 & CHEM 2091, and CHEM 2080 & CHEM 2081 (or a score of 5 on the CEEB Advanced Placement exam for Chemistry and CHEM 2150 or CHEM 2080 & CHEM 2081)
- Physics: PHYS 1112, PHYS 1110, and PHYS 2213
- Computing: CS 111X
- Engineering Distribution: One Introduction to Engineering course (ENGR 1XXX), ENGRD 2190, and CHEM 3890
- Two First-Year Writing Seminars
- One Liberal Studies Distribution course

Students applying in the fourth semester must be on track to complete the following prerequisites for junior year as well as the core requirements listed above: MATH 2940 or CEE 3040 or ENGRD 2700, CHEM 2900, CHEM 2200, CHEM 3230, and additional Liberal Studies Distribution course.

Civil Engineering

GPA ≥ 2.0 in all engineering, math, and science courses that have been completed at the time of affiliation. C grade or higher in ENGRD 2020.

Computer Science

At least C (not C-) in all completed CS courses and all critical math courses. GPA ≥ 2.5 in CS 2110/ CS 2112 and CS 2800/ CS 2802, or ECE 2400/ENGRD 2140 and CS 2800/CS 2802 and CS 3110. CS GPA calculation may be supplemented by the following courses: CS 3110 and CS 3410/ CS 3420. GPA ≥ 2.3 between MATH 1920 and any other completed critical math course(s): MATH 2940, MATH 4710, BTRY 3080/STSCI 3080, CS 4850, ECON 3130, ECE 3100, ENGRD 2700. If only AP/CASE credit appears, then another Cornell critical math course must be taken to affiliate. Qualifying courses must be taken at Cornell for a letter grade. A required supplemental application must be submitted along with the College of Engineering Application for Major Affiliation.

Earth and Atmospheric Sciences

The following courses must be completed or currently enrolled in at the time of affiliation: MATH 1910, MATH 1920, MATH 2930, MATH 2940, PHYS 1110, PHYS 1112, PHYS 2213, CHEM 2090 & CHEM 2091, CHEM 2080 & CHEM 2081 (or CHEM 1570 or PHYS 2214). Must have at least a C- in all courses taken and a cumulative GPA of 2.3 or higher.

Electrical and Computer Engineering

At least C+ in: MATH 2930 or MATH 2940, PHYS 2213, and one of ECE 2100/ENGRD 2100, ECE 2720 or ECE 2300/ENGRD 2300. Must have a GPA ≥ 2.5 in (if completed): MATH 1920, MATH 2930, MATH 2940, PHYS 2213, ENGRD 2110, ECE 2400/ENGRD 2140, ECE 2300/ENGRD 2300, ECE 2100/ENGRD 2100, ECE 2720/ENGRD 2720.

Engineering Physics

At least B- in all required math and physics courses: MATH 1910, MATH 1920, MATH 2930, MATH 2940, PHYS 1110, PHYS 1112/PHYS 1116, PHYS 2213/PHYS 2217, PHYS 2214/PHYS 2218, PHYS 2210.

Environmental Engineering¹

GPA ≥ 2.0 in all math, science, and engineering courses. At least C- in BEE 2510/ENGRD 2510.

Independent Major

Students must submit, and receive approval for, a proposed program including endorsement from advisors for a primary and secondary area. See the IM website (<https://www.engineering.cornell.edu/independent-major/>) for specific requirements and deadlines.

Information Science Systems, and Technology

At least a C in two of MATH 2940, CS 2110/ENGRD 2110, and ENGRD 2700 (must have taken at least two of these courses at time of affiliation). GPA ≥ 2.5 between CS 2110/ENGRD 2110, ENGRD 2700, and all completed MATH and ISST Major core courses. Qualifying courses must be taken at Cornell, and for a letter grade. A required supplemental application (<https://affiliations.coecis.cornell.edu/is/>) must be submitted to ISST in addition to the College of Engineering's Application for Major Affiliation.

Students in their senior year of study intending to change majors to ISST or add ISST as a second major must submit a course plan to demonstrate they can complete all degree requirements by their current expected graduation date.

Materials Science and Engineering

On track to complete by the end of the fourth semester the following required courses, and completion of at least 24 credits from these courses, when applying for affiliation: MATH 1910, MATH 1920, MATH 2930, MATH 2940 (all with a minimum grade of C), PHYS 1110, PHYS 1112/PHYS 1116, PHYS 2213/PHYS 2213, CHEM 2090 & CHEM 2091, and CS 1110/CS 1112.

Additionally, cumulative GPA ≥ 2.0 in the completed required math, physics, and chemistry courses (including MSE 3010 if taken) and at least C in ENGRD 2610 or ENGRD 2620.

For any course that is repeated, the most recent grade will be used for affiliation requirements. However, repeated grades will be included for GPA calculations.

Students who will not satisfy these requirements by the end of the fourth semester should contact the MSE department about alternative paths to affiliation.

Mechanical Engineering

At least C- in ENGRD 2020 and all completed required math, physics, chemistry, and computer science courses. ENGRD 2210 is recommended prior to affiliation. GPA > 2.5 in these courses: ENGRD 2210 (if taken), MATH 2930, PHYS 2213, and ENGRD 2020.

Operations Research and Engineering

At least C in each of ENGRD 2700 and MATH 2940. GPA ≥ 2.2 in math, science, and engineering courses (both overall and in the term immediately before affiliation). At least C- in all ORIE courses completed thus far. Good academic standing in the College of Engineering.

¹ Students may major in biological engineering and environmental engineering through the College of Engineering or the College of

Agriculture and Life Sciences (CALS). Students who do so through the College of Agriculture and Life Sciences are jointly administered by the College of Engineering and the College of Agriculture and Life Sciences.

Honors Program Within Majors

Many of the engineering majors supplement the major with an honors program.

Eligibility

The B.S. degree with honors is granted to engineering students who, in addition to having completed the requirements for a B.S. degree in a major, satisfactorily complete the honors program in the major and are recommended for the degree by the honors committee of that major. To enter an honors program, the student must be on track to graduate with distinction, and a student who does not stay on track to graduate with distinction is will be dropped from the honors program.

At least 9 extra credit hours are required for the honors degree, and a student must be in the program for at least two semesters before graduation. Courses taken to satisfy the honors requirement may not be used to satisfy any other B.S. degree requirements.

No research, independent study, or teaching for which the student is paid may be counted toward the honors program.

Procedures

An applicant to the honors program in a major must have an honors advisor: a faculty member from that major who will supervise the honors program and direct any research or project. The honors advisor need not be the student's advisor in the major.

The application for the honors program should be a letter from the student that describes the proposed honors program in detail and includes the explicit approval of the honors advisor.

Students must complete a written application no later than the beginning of the first semester of their senior year, but they are encouraged to make arrangements with the honors advisor during the second semester of their junior year. Each major may place further constraints on timing.

Major-Specific Information

Each major defines the content of the honors program and may also place other requirements on the program, in terms of timing, content, and procedures. Information is given within the description of the individual majors.
